Inelators HS

Schedule J: Job Content Questionnaire as programmed in Qualtrics

Instructions

Job Content Questionnaire (JCQ) Instructions

Read the questions carefully. Be brief, but include enough detail to provide a fulsome and clear picture of the role. Spell out acronyms and/or provide definitions for any unit/function-specific terms.

The position summary (also known as a job description) for the job will be helpful to have available, since there are sections of the JCQ where content may be copied from the position summary.

You can navigate between the questions and sections by clicking the "Back" and "Next" buttons at the bottom of each page. Do not use the browser's back button; it will take you out of the JCQ.

The JCQ has branching logic built in; therefore, some questions will only be shown depending on answers to prior questions in that section (e.g. If you select no, the linked questions that directly follow will not be shown or need to be completed).

The JCQ allows for completion in multiple sessions. The answers you enter will be automatically saved once you click the "Next" button at the bottom of each page. You can leave the JCQ unfinished at any point by closing your browser by clicking on the X at the top right of your screen. You can continue filling out the JCQ at another time by clicking on the link that was sent to you. You will be returned to the page that you last completed.

There will be opportunity for review and a final warning message at the end of the JCQ. Once you press "Next" on the <u>last page</u>, you will not be able to return to the JCQ.

Once your submitted JCQ is reviewed by HR, you will receive an email for the next steps/sign-off process.

For further information see the website Queen's & USW Job Evaluation System Project

If you have further questions or require assistance, submit a Support Request.

At any point in the questionnaire you can leave it by closing your browser by clicking on the X at the top right of your screen. You can continue filling out the questionnaire another time by clicking on the link that was sent to you in the email.

Section 2 - Education

Section 2 of 14: Education

The following questions refer to the minimum education **required for someone to be hired into the job.**

Select the minimum level of education required to perform the essential job duties.

This should reflect the requirement of the job, not the personal education level of the current incumbent, which may be more or less than what is required.

O Secondary schoo			
_	dary education, up to and	including one year	
	nity college diploma		
O Three-year Bache	nunity college diploma

This is the end of Section 2 of 14: Education. The answers that you have entered will be automatically saved once you hit the next button at the end of each page. At any point in the questionnaire you can leave it by closing your browser by clicking on the X at the top right of your screen. You can continue filling out the questionnaire another time by clicking on the link that was sent to you in the email.

Section 3 - Experience

Section 3 of 14: Experience

The following questions refer to the minimum amount of experience needed for someone to be hired into the job, assuming that the person would have the required education level.

The questions are divided into two periods of time:

- · What would it take to get the job?
- What would it take for a person to get up to speed with the requirements after starting in the job?

Select the minimum amount of directly related job experience a person would need to start in the job. This should reflect the requirements of the job, not the personal experience of the current incumbent, which may be more or less than what is required.

\cup	Up to	and	including	3	months
	8.4	41	A		

- More than 3 months and up to and including 6 months
- O More than 6 months and up to and including 1 year
- O More than 1 year and up to and including 2 years
- O More than 2 years and up to and including 3 years
- More than 3 years and up to and including 4 years
- O More than 4 years and up to and including 5 years
- O More than 5 years

Explain why the experience is necessary and provide any details that are relevant about the type of experience required.

tra	assuming that a person has the minimum pre-job experience specified, what is the minimum on-the raining and/or learning period a person new to the job would need before being able to perform all tasks and ensure the smooth flow of work?

	lease provide further details about the learning period. Be sure to explain the rationale for more that ear of on-the-job training.	an 1

This is the end of Section 3 of 14: Experience. The answers that you have entered will be automatically saved once you hit the next button at the end of each page. At any point in the questionnaire you can leave it by closing your browser by clicking on the X at the top right of your screen. You can continue filling out the questionnaire another time by clicking on the link that was sent to you in the email.

Section 4 - Interpersonal and Communication Skills

Section 4 of 14: Interpersonal and Communication Skills

The following questions identify the requirement in the job to interact and communicate with <u>regular</u> contacts, both within and outside of the University.

The following is a list of possible contacts for Queen's University employees. It is provided as an aid to help you to think of all the people with whom the job interacts regularly. Please choose all those with

whom the job is regularly required to interact. Co-workers government officials faculty individual donors students medical professionals internal clients legal counsel external clients media heads of other departments professional colleagues general public, including patients prospective employers external suppliers/contractors representatives of professional organizations volunteers residents of student housing funding organizations Other, please specify: retirees Other, please specify: alumni Other, please specify: auditors Other, please specify: Consider the types of interactions below that are encountered in many jobs. Keeping in mind the contacts identified in the previous question, select the 5 interactions required on a recurring basis, that are most challenging or require the highest level of specialized interpersonal skill. Common courtesy and effective listening ■ Working cooperatively with others Giving or asking for basic information Communicating technical, scientific or administrative information Expressing support or compassion Explaining technical matters in non-technical terms Delivering detailed oral and/or written information Exchanging straightforward oral and/or written information Exercising discretion or diplomacy Explaining ideas related to complex or controversial issues Acting as resource person through interaction with staff, students, public, patients or clients Providing recommendations/advice for action Advising students (e.g. regarding academic progression, awards, regulations and/or policies, etc.) Persuading others to adopt or change their actions Probing for information Relaying information that may not be well-received Resolving complaints or challenging interpersonal situations Developing instructional materials for specific users Developing and cultivating rapport to build and foster trust, credibility and/or strategic

Section 5 - Problem Solving and Complexity
Section 5 of 14: Problem Solving and Complexity
The following questions identify the requirement in the job to understand, collect, interpret and analyze information to identify and solve problems and take action.
Most jobs require a range of skills to identify and solve problems. Consider the tasks below that are found in many jobs. <u>Select 3-5 tasks</u> that show the most challenging, specialized or complex nature of situations faced in this job.
Applying known solutions to straightforward problems
Identifying the source of problems
Developing innovative or creative solutions to problems where past precedent did not provide a solution
Searching for or gathering relevant information

Evaluating complex information
 Performing routine tasks using a checklist
Keeping records (input data into existing format) and/or identifying missing or mismatched data
Analyzing or interpreting meaning of documents
Using math (standard operations, formulae and/or equations, statistics)
Using technical symbols or terms (legal/medical/scientific, etc.)
Performing equipment maintenance
Troubleshooting and/or repairing equipment malfunction
Applying standardized technical/scientific/medical procedures or protocols with some modification
Executing complex, multi-step procedures or protocols to produce complex equipment/materials
Using existing templates to produce correspondence or complete forms
Composing content for formal documents or websites
Composing, editing or adapting content of written or graphic materials (requiring knowledge of subject matter)
Generating financial reports
Assessing techniques carried out by others
indicated that applying known solutions to straightforward problems occurs in this job. Please ride an example that illustrates the challenge, specialization and/or complexity involved.

You indicated that developing innovative or creative solutions to problems where past precedent did not provide a solution occurs in this job. Please provide an example that illustrates the challenge, specialization and/or complexity involved.

Section 6 - Supervision and Functional Guidance

Section 6 of 14: Supervision and Functional Guidance

The following questions gather information on the responsibility for the coordination, direction and/or supervision of continuing/term employees, casual staff, work study students, volunteers and/or external suppliers/contractors.

Does this role have ongoing responsibility for supervising others?

Ongoing responsibility means supervising at least one individual at any one time (continuing/term employees, casual staff, work study students, volunteers, external supplier/contractors).

Note: work study students: includes Summer Work Experience Program (SWEP), work study/bursary and student contracts (Teaching Assistant (TA)/Research Assistant (RA)).

Supervising is defined as:

- · scheduling and assigning work
- · monitoring and assessing the quality of work
- providing input on work performance to management staff and identifying development and training opportunities
- providing coaching, participating in screening/interviewing job candidates and providing input into staff selection as appropriate

Please provide an example of a project for which this job had planning/coordination responsibilities. Be sure to describe the size and significance of the project, along with the role and responsibility of this job.

This is the end of Section 7 of 14: Planning and Coordination. The answers that you have entered will be automatically saved once you hit the next button at the end of each page. At any point in the questionnaire you can leave it by closing your browser by clicking on the X at the top right of your screen. You can continue filling out the questionnaire another time by clicking on the link that was sent to you in the email.

Section 8 - Impact of Decisions

Section 8 of 14: Impact of Decisions

The following questions refer to the responsibility for decision making and the impact of these decisions on own work, the work of others or the broader University community.

Please provide an example of the highest level of decision that this role is expected to make without consulting a manager or other senior employee.

Consider current and recurring decisions that impact any of the following areas:

- · Academic and/or non-academic programs or services
- Financial resources
- · Physical resources

Information resourcesHealth/safety of others

Sometimes decisions are made with limited or inaccurate information, and/or changing circumstances, which can lead to errors. Select the statement below that best describes the impact or consequence of errors that might be made in the job.

Consider errors that might occur, even with reasonable care and checks and balances applied.

0	Errors generally do not affect the quality of service, are readily detected and require little loss of time or money to correct.
0	Errors may result in delays to succeeding steps or phases of work but are almost always detected before an effect is felt.
0	Errors may cause work interruption and loss of time, and may not be readily detected.
0	Errors may be costly to correct, require major reworking or cause major breakdowns and are difficult to detect
0	Errors are resource-intensive to correct and are extremely difficult to detect.
Prov	vide an example of an error that could occur that fits the statement selected in the prior question. Be
sure	e to illustrate the full result of this error, including how it would be detected, who it would impact and
sure	vide an example of an error that could occur that fits the statement selected in the prior question. Be to illustrate the full result of this error, including how it would be detected, who it would impact and it would need to be done to correct the error.

Section 9 - Physical Effort

Section 9 of 14: Physical Effort

The following questions measure the duration and intensity of the physical demands required in the job. Intensity of physical effort is measured as low, moderate or high. Typical examples of low, moderate and high levels of physical effort are shown in the levels below:

Low:

- Work involves sitting most of the time, but may involve walking or standing for brief periods of time with choice of position or intermittent keyboarding throughout the work time.
- Work restricted to work station with little opportunity to move around for up to 3.5 hours per day.
- Periods of continuous keyboarding or other finger and hand movements for less than 20 minutes at
 a time uninterrupted by other activities.
- · Occasional lifting and/or moving of light objects.

Moderate:

- Requires walking or standing for at least 1 hour at a time for 2 to 3.5 hours cumulatively per day.
- Work restricted to work station with little opportunity to move around for more than 3.5 hours per day.

- Periods of continuous keyboarding or other finger and hand movements (including clicking and scrolling) for at least 20 minutes at a time uninterrupted by other activities to a maximum of 3.5 hours cumulatively per day.
- Work in awkward physical positions, or on uneven terrain with possibility of regular breaks (i.e. relief at desired times) for 1 to 2 hours per day.
- Regular lifting and/or moving of objects weighing up to 20 lbs (9 kg), lighter awkward loads, or occasional lifting of heavy objects
- For jobs that are mostly sedentary, requires work with light tools and equipment for 2 to 3.5 hours per day.

High:

- Requires walking or standing for at least 1 hour at a time for more than 3.5 hours cumulatively per day.
- Periods of continuous keyboarding or other finger and hand movements (including clicking and scrolling) for at least 20 minutes at a time uninterrupted by other activities beyond 3.5 hours cumulatively per day.
- Work in awkward physical positions, or on uneven terrain for more than 2 hours per day.
- Regular lifting and/or moving of heavy objects, more than 20 lbs (9 kg).
- Work with light tools and equipment for more than 3.5 hours per day.

Section 10 - Concentration

Section 10 of 14: Concentration

The following questions measure the duration and intensity of mental and sensory demands required to perform the job. For the questions below that require a time estimate, assume a 35-hour work week (i.e. the answers from all questions in this section should add up to 35 hours).

In a typical week for this job, are there any tasks that require significant understanding and manipulation of the content for output?

Examples include:

- · Complex word processing or graphical layout
- · Creation of spreadsheets including new formulae
- Advising students
- Providing detailed information
- · Minute taking at meetings and transcription
- Cleaning (special protocol)
- · Careful listening/observation or reading to discern relevant information and/or take rapid action
- Using tools or mechanical equipment

Yes

- Completing multi-step forms, applications and protocols
- · Performing standardized experiments, repairs and/or routine calibration using established standards

In a typical week, estimate how much time (in hours) is spent on tasks that require very little attention to the content or meaning of the output?

H) 140

Examples include:

- · Alphabetic filing
- Cleaning (normal protocol)
- · Shelving books or supplies
- · Monitoring machines
- · Attending to demands for recurring information
- · Inputting or formatting data transferred from another source

0

The total of all time estimates in your prior questions on concentration add up to **0**. The total should add up to 35 hours. If applicable, go back to the prior questions and adjust the times so that the total is 35 hours.

Select yes below if the total adds up to 35 hours, or no if there is an intentional reason for the total to add to more or less than 35 hours.

Yes No O

Please explain why the total time estimates for concentration are more or less than 35 hours.

Potential explanations include:

- Non-standard work week (part-time or shift work)
- Some tasks occur simultaneously (e.g. advising students and providing detailed information)

If applicable, please indicate any additional information that would allow a better understanding of the concentration demands of this job.

This is the end of Section 10 of 14: Concentration. The answers that you have entered will be automatically saved once you hit the next button at the end of each page. At any point in the questionnaire you can leave it by closing your browser by clicking on the X at the top right of your screen. You can continue filling out the questionnaire another time by clicking on the link that was sent to you in the email.

Section 11 - Physical Environment/Health and Safety Risks - Part 1

Section 11 of 14: Physical Environment/Health and Safety Risks - Part 1

The following questions collect information on the disagreeable conditions in the physical environment in which the work must be performed. Only consider conditions that are inherent to the job. **Assume all necessary measures to protect comfort have been applied.**

The chart below lists disagreeable conditions that are present in some jobs. Please indicate the frequency with which the condition occurs in this job.

Na.	Never/Rare (less than 10% of the time annually)	Occasional (10 - 33% of the time annually)	Frequent (33 - 66% of the time annually)	Almost continuous (more than 66% of the time annually)
Exposure to biological or chemical odours or substances	0	0	0	0
Exposure to dust, dirt, grease or oil	0	0	0	0
Exposure to high noise levels	0	0	0	0
Poor lighting or glare	0	0	0	0
Requirement to wear cumbersome or uncomfortable protective equipment	0	0	0	0

Section 12 - Physical Environment/Health and Safety Risks - Part 2

Section 12 of 14:

Physical Environment/Health and Safety Risks - Part 2

Queen's University is committed to the prevention of illness and injury through the provision and maintenance of a healthy and safe campus. The University endeavours to meet its responsibilities for the health and safety of the members of its community by complying with relevant health and safety standards and legislative requirements, and by assigning general and specific responsibilities for workplace health and safety.

The following questions collect information on the level of residual risk that is present after all safety equipment has been provided and all safety precautions have been taken.

The chart below lists hazards that are present in some jobs. For each hazardous condition, indicate the frequency with which it is present in this job.

Almost

	Never/Rare (less than 10% of the time annually)	Occasional (10 - 33% of the time annually)	Frequent (33 - 66% of the time annually)	(more than 66% of the time annually)
